CSA 3714 Software Testing

Priyanka.P CO1 - AT 3

192311423 MCQ

1. b) High coverage

2. b) Improve testing strategy

3. b) Testing as an engineering activity

4. b) Test design technique

5. b) Validation

6. b) Earlier phase issues

7. b) User requirements

8. b) Poor Process

9. c) Typo error

10. b) Testing efficiency

11. b) Requirement defect

12. b) Improve quality

13. b) Increased defects in production

14. b) Structured testing

15. b) Product Reliability

16. d) Redundancy

17. a) Predicting issues

18. b) Organized testing

19. b) Teamwork

20. b) Security defect

21. a) Coding error

22. b) UI defect

23. b) Traceability
24. b) Risk based Testing
25. a) Efficiency in Testing
26. b) consistent quality
27. b) Ensure fixes work
28. b) Coding defects
29. b) Performance defect
30. b) Detect edge case defects
31. b) Executing test cases systematically
32. a) Functional defect
33. b) Exhaustive testing is impossible
34. b) Experience based testing
35. b) Requirement phase
36. b) Organize defects
37. b) Tester's responsibility
38. b) External behaviours
39. b) Design defect
40. b) Early defect detection
41. b) Software quality process
42. b) Prioritize fixing
43. b) Test execution
44. a) Functional defect
45. a) Developers fix quickly
46. a) Reduce defects cost
47. b) Maintenance cost
48. b) Process-driven testing
49. b) Fix Prioritization
50. b) Improved software quality
51. d) Documentation defect
52. b) Core functionality
53. c) Store defect details
54. b) Redundant Tests
55. c) Regression Testing
56. b) Prevent recurrence
57. a) Defect cost
58. b) Poor traceability
59. c) Coding defect
60. b) Tester
